

"We believe the invisibleBracelet will revolutionize patient services and become the new standard of practice for the ambulance services industry. For millions of Americans, iB will, and should, become an essential. This method of information sharing between EMS providers and patients is the perfect blend of technology and simplicity that will save more lives and relieve anxiety for family members."

Jim Finger

American Ambulance Association President

The American Ambulance Association (AAA), the voice for ambulance services nationwide, is creating a web-based national emergency health registry through a partnership with invisibleBracelet.org.

iB

The first 20 minutes of an emergency are the most critical.

iB saves time which saves lives for \$5 a year. Emergencies happen: How much time are you willing to waste?

What is invisibleBracelet (iB)? ▼

iB is a virtual medical bracelet, meaning it's not actually worn. iB is an online HIPAA-compliant web service that allows members to register vital health information accessible to local Emergency Medical Service (EMS) providers during emergencies. Membership is \$5 a year.

- ▶ **iB increases the ability of medics to provide proactive care and save lives.**
- ▶ **iB improves coordination of care for patients transported by ambulance.**
- ▶ **iB allows providers to immediately notify a patient's "In Case of Emergency" (ICE) contacts via text message or email when ambulance transport is necessary.**

How invisibleBracelet works ▼

- ▶ Go to invisiblebracelet.org and register to become a member.
- ▶ Members are mailed an iB membership card with a unique personal identification number (PIN) along with stickers to place on identification cards such as drivers license if legal in your state, insurance cards, employee or student badges and key fobs for key chains or bags.
- ▶ Members login to the online HIPAA-compliant iB system using their PIN to register vital health information (i.e., allergies, medications, chronic conditions, insurance), and up to 10 in case of emergency (ICE) contacts.
- ▶ Authorized EMS providers may access a patient's information electronically on the scene of an emergency and notify ICE contacts if transport to a hospital is required. Members are encouraged to update their health information and ICE contacts regularly to maximize the benefit of the service.

iB Security

iB is a voluntary service that puts the patient in control of the information medics can access. iB exceeds federal and state patient privacy and security laws. We create audit logs every time your data is accessed. That way, we can guarantee a record of when a patient's data was viewed and by which authorized medic.

iB for Organizations

Invisible Bracelet adds value to your employee benefits program without breaking the bank. iB offers a creative solution to express your organization's interest in the wellbeing of your workforce while maintaining expenses.

Providing iB to employees is a small gesture that sends a big message: Your company cares about the safety of their employees.

The iB support team is available to help you promote the benefits to your workforce.
